

# INSULATION PROFESSIONALS OF OHIO

A coalition of the industry's foremost Insulation Contractors – providing superior insulation services for **Industrial, Commercial** and **Residential** projects.

## **Our Standard is Green Construction!** **That is why we have been Green for over 100 years!**

It's a fact: Insulation helps protect the environment because properly installed mechanical insulation provides long-term energy efficiency and greenhouse-gas emissions reduction. With the adequate and proper design, installation and thickness of insulation on all mechanical systems, buildings are made more efficient and environmentally friendly.

**Insulation Professionals of Ohio member contractors and their professional workforce understand what it takes to create a sustainable environment ... that's why they are well-prepared to ensure construction projects are LEED CERTIFIED (Leadership in Energy and Environmental Design), based on the LEED ecology-oriented building certification program run under the U.S. Green Building Council.**

If a simple valve is properly insulated with 2-inches of insulation, within a year the building would save:

- 49 million BTU's of heat loss
- 7,600 pounds of CO2 emissions
- 15 pounds of nitrogen oxides emissions

*(Calculations obtained using NAIMA 3E Plus version 4.0 software)*
